

**Does Your
Home Have A
Mold Problem?**
We'll Find Out!

NPI Phoenix is Now Offering Mold Testing

Mold can grow in any home with moisture intrusion, no matter the home's age or overall condition. If undetected, fungal growth can harm your family's health, leading to respiratory issues like asthma and allergies. At NPI, we're professionally trained to collect samples, confirm the presence of mold and help you determine the best way to rid your home.
